

BUILDING, STRUCTURE, AND OBJECT RECORD

Page 2 of 12

*NRHP Status Code 6

*Resource Name or # (Assigned by recorder) TPP-5

B1. Historic Name: See Significance Statement

B2. Common Name: PG&E Stanislaus-Newark Circuits #1 & #2

B3. Original Use: 110 kV Transmission Lines

B4. Present Use: 115 kV Transmission Lines

*B5. Architectural Style: n/a

*B6. Construction History: (Construction date, alterations, and date of alterations) Circuit # 1: 1908; Circuit #2: 1909-1910

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: _____ Original Location: _____

*B8. Related Features: None

B9a. Architect: n/a b. Builder: Sanderson & Porter, Consulting Engineers

*B10. Significance: Theme n/a Area n/a Period of Significance n/a

Property Type n/a Applicable Criteria n/a (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Two of the three sets of transmission towers in TPP-5 appear to be intact examples of early long-distance transmission line towers. However, the center set of towers was replaced in 1988 with taller towers. The three sets of towers recorded for TPP-5 lack integrity of original design, materials and setting, and are part of a larger tower system that lacks integrity and significance as described below (see continuation sheet).

B11. Additional Resource Attributes: (List attributes and codes)

*B12. References: JRP Historical Consulting Services, "Historic Resources Inventory and Evaluation Report, Transmission Lines in the Stanislaus Corridor, Alameda County, California," October 2000.

B13. Remarks:

*B14. Evaluator: JRP Historical Consulting Services, URS Corporation

*Date of Evaluation: October 2000, September 2001
